

COMEXAS COLD CARE

Your Logistics. Our Commitment.

At COMEXAS we have gained extensive knowledge in the handling of sensitive cargos. As a result, we have developed specific procedures tailored to the treatment and transportation of perishable goods.

Our **Cold Care** brand is devoted to the effective and efficient handling, storage and transportation of your perishables. This includes fruits, vegetables, dairy products, meats, flowers and wines. Our program focuses on preserving the cold chain via the strict control of temperature and air quality together with the use of advanced techniques and cutting-edge technology.

Our refrigerated storage facilities in Antwerp and Brussels allow us to provide world-class sea and air freight forwarding and consolidation from any destination in Europe. Although COMEXAS operates along most shipping corridors, our presence in the DRC, Ghana and South Africa reflects our continuous commitment to Africa.

The COMEXAS **Cold Care** departments in Belgium, the DRC, Ghana and South Africa will attend to all your logistics requirements. Operations range from the clearing and forwarding of air cargos to the handling and delivery of your perishables. Your logistics is our commitment.
