

# COMEXAS LOGISTICS

*Your Logistics. Our Commitment.*

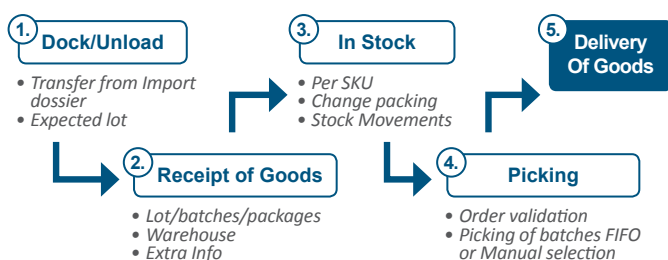

At COMEXAS, our mission is to commit to service and quality logistics through a human approach. We aim to achieve this by establishing personal and direct contact with all of our customers. We continuously encourage our co-workers to strive towards excellence by applying our family values and business know-how.

## Warehousing

COMEXAS offers a range of long and short-term storage solutions. These include warehouses, open yards, dedicated and shared operations, and free and bonded storage for both dry and perishable cargo.

Handling equipment for picking, packing, order preparation, pre-retail and distribution is available and manned by trained professionals at all times.

All our offices across Europe and Africa use a standardized warehouse management software that is fully integrated with our freight and accounting module. This program is developed and maintained for COMEXAS and allows us to manage the inventory of multiple products for multiple customers in multiple warehouses. For data protection purposes, the software, its contents and data updates are hosted on COMEXAS servers situated in Belgium.

## Transport and Distribution

We offer a complete range of international haulage services. These include palletised transport for FMCG, boxed trailers for L.C.L, flatbeds with twist locks for full container loads, low beds and low-loaders for RORO and equipment, and specialised extendable and modular trailers for heavy-hauls and oversized transport.

Our team is comprised of highly experienced transportation professionals who are dedicated to finding the appropriate solution for your needs. All our transport partners have a proven track record of successful collaborations and are carefully selected based on their financial, operational and organizational performances. In some regions, we operate our own fleet of trucks and specialised equipment which are all equipped with a global positioning system in order to track your cargo.
